

Escent Vision Remote Functions

The PLAY button can be used to clear text fields in the Edit screens. Instead of pressing backspace several times when you want to clear the entire field, press PLAY.

The Scan Back button can be used as “backspace” when editing text fields.

The Scan Forward button can be used as a “space”, similar to the spacebar on a keyboard when editing text fields.

The HOME button is a one-button press to always return you to the Main Menu.

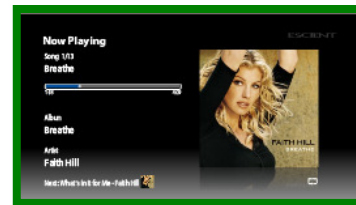

The BACK button is used to go back one screen per press.

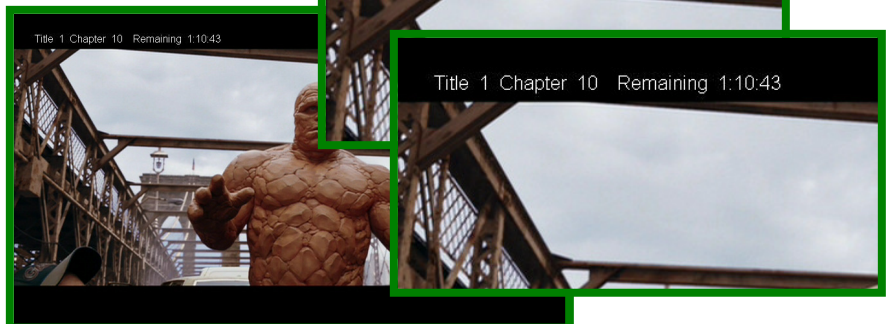

The Left Arrow button can also be used to go BACK one screen per press. (same as the BACK button)

The MENU / VIEW button is a shortcut to the NOW PLAYING screen.

The INFO button can show a movie running time or the remaining time while watching a Movie. Press once to show running time, press again to show remaining time. Press once more to dismiss.

The MODE button will toggle various aspect ratios for movies while movie is playing. "aspect 1", "aspect 2", "aspect 3", "aspect 4", & "auto-adjust". Default is "auto-adjust".

Advanced MACRO functions:

Set NTSC video output (default) =  +  + 

Set PAL video output =  +  + 

Reset Vision application =  +  +
